SUMMARY

Software Engineering student with hands-on experience in Full-Stack Development using Node.js, Express.js, React.js, and MySQL. Strong foundation in Data Structures & Algorithms, OOP, REST APIs, and Git. Passionate about building scalable, production-ready applications.

EXPERIENCE

INTERNSHIP Early Stage Product Startup (Confidential) | Hybrid

September 2025 – Present

- Developing and maintaining a **MERN**-based full-stack application using React.js, Node.js, Express.js, MongoDB, and MySQL.
- Implemented stateless **JWT** authentication with **role-based access control**, reducing unauthorized access incidents and improving session validation latency by 25%.
- Optimized **Supabase schema design** and indexing strategies, reducing average API response time from ~450ms to ~150ms.
- Architected modular backend following **MVC** pattern and REST principles to improve maintainability.
- Deployed and managed applications on **AWS**; collaborated using Git/GitHub for version control and feature development

EDUCATION

Ajeenkya D Y Patil School of Engineering Lohegaon, Pune

Bachelor of Engineering in Artificial Intelligence and Data Science

September 2023 – June 2027

PROJECTS

Snookhead – Full Stack Web Application ([Snookhead](#))

- Built a MERN-based full-stack web application to solve real-world workflow inefficiencies by providing a structured and scalable platform with a clean frontend-backend architecture.
- Implemented **role-based authentication** (User/Admin) using secure login APIs, database-driven access control, and RESTful backend services.

Adventure Website ([Adventure](#))

- A adventure website built with, Express, React, Node.js focusing on **Software Development** practices in a **Digital** landscape.
- Implemented user authentication, and dynamic UI, demonstrating knowledge in **Software Engineering** with a strong emphasis on **Organizational** tasks.

Automated Post Generator | n8n, APIs ([linkedin-Automated](#))

- Build an automated social media post generator using n8n to streamline content creation, enhancing **Productivity Tool** and efficiency in **Application Development**.
- Designed the workflows integrating APIs to auto-generate posts, reducing manual efforts while adhering to **Coding Standards** and ensuring **Compliance**.

TECHNICAL SKILL

- Programming Languages:** JavaScript (ES6+), Python
- Frontend:** React.js (Hooks, Context API, Responsive UI, Component-Based Architecture), HTML5, CSS3
- Backend:** Node.js, Express.js (RESTful API Development, JWT Authentication, Middleware)
- Databases:** MongoDB, MySQL (Schema Design, CRUD Operations, Query Optimization)
- Tools & Deployment:** Git, GitHub, Render, Vercel, AWS, Postman, n8n
- Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Role-Based Access Control (RBAC), API Integration,
- Core Strengths:** API integration, role-based access control, bug fixing, scalable application development.

ACHIVEMENTS

- Selected for Smart India Hackathon (SIH) 2025 Grand Finale**, representing the team at the national level after clearing multiple evaluation rounds.
- Won first prize in college level comitition in the Alcohol Sensor project, highlighting my **Commitment** and passion for innovation, successfully addressing a real-world **Challenge**.
